A PROJECT WHERE PEOPLE’S PERCEPTION MATTERS

- IoT sensors allied with Architecture and Sociology
- Colorful 3D Models that users can interact with
  - Vast range of applications, such as Crowd Control, Comfort Management, Building Management and Efficiency
  - Low-Power consumption, highly scalable and cost effective
- Technologies of the future such as LoRa for communications
  And BIM for 3D designs

POWERED BY
USERS’ FEEDBACK AND
SENSOR’S DATA TO CREATE
METRICS AND VISUAL OUTPUTS
SUCH AS 3D HEAT MAPS AND COLORED AVATARS
